

Torre Pacheco, Spain, 17th January 2023

MERIDIEM SEEDS S.L., a company engaged in the production and marketing of vegetable seeds, certifies the following information regarding the seeds marketed by our company:

- All seed varieties that are marketed meet the EEC standards for production, quality and health, in compliance with regulations from the Ministry of Agriculture, Fishing and Food: article 18911, 01 July 1986, on Technical Standards on the Control and Certification of Vegetable Plant Seeds (EEC Council Directive 70/458), published in Spain's Official State Bulletin (BOE) Nº 169, 16-July-1986, with its later modifications (Royal Decree 323/2000 of 3rd March, BOE Nº 55, 4-March-2000 and Council Directive 2002/55/CE, 13-June-2002, on the marketing of vegetable seeds).
- Our seeds belong to the standard seed classification.
- NONE of the varieties that our company markets or tests are genetically modified (GMO); therefore, they are NOT transgenic varieties. They have been obtained through the work of breeding and classical genetic selection of plants, without use of genetic modification techniques.
- In the event that the seed has been treated with a specific product, this shall be indicated on the packaging, as required by regulations in force (see Appendix VII of the Order of 01-July-1986). When the label does not expressly state otherwise, the seed is free of fungicide and insecticide, and free of chemical products in general.
- Meridiem Seeds does not issue individual certificates for a specific lot or variety.
- Information regarding the name of the variety, lot number and other data is clearly indicated on the package and in the sales documentation.
- Meridiem Seeds does not supply organic seeds of any kind. If this product were to be offered in the future, it shall be included on this document.
- Product specifications for each variety can be found and printed from our website www.meridiemseeds.com.

Best regards,

Signed: José Jiménez-Roset
